Sofford. 1626.

A new Almanacke and Prog-
nostication, for the yeare of
our Lord God.

1626.

Being the second from the Bissextile or Leap-yeare.

Calculated for the Latitude
and Meridian of the most Ho-
nourable Citie of London;
where the Pole is elevated
aboue the Horizon, 51.
deg. and 32. min.

And may very well serue for
most parts of Great
Britaine.

By Arthur Sofford *Philomathist.*

Os homini sublime dedit, cœlumq; videre
Iussit, & erectos ad sydera tollere vul-
tus.

LONDON,
Printed for the Company of
Stationers.

Iulian or Engliſh account.		*Lilian Greg. or Rom. account.*

5543	1613	Middletons water-worke finished	13
5548	1618	A Comet or blazing starre, from the 18 of Nouem. till the 16 of December following.	8

¶ Astronomicall Calculations for this *present yeare*, 1626.

THe true præcession of the Æquinoctiall (according to Tycho Brahe, and others the best moderne Astronomers of this our age) is 28. de: 37 min: and 11 seconds.

The greatest obliquity of the Zodiacke, is 23. degrees, 31 min: and 30 seconds.

The Eccentricity of the Sunne is 3588. parts, the totall signe being 100,000.

The true places of the Auges of the Planets according to moderne obseruation. *An. Dom.* 1626.	♄	0.	11.	21.	♑
	♃	7.	26.	27.	♌
	♂	29.	28.	28.	♋
	☉	5.	58.	30.	♍
	♀	16.	58.	11.	♊
	☿	1.	19.	39.	♐

Of

Of the foure Quarters of the yeare, and first of Winter.

WInter toke its beginning vpon the 11. day of December last past at 6 a clocke and 7 min. in the afternoone. The nature of this Quarter is cold and moyst, therefore it is fitly resembled vnto the first declining age, to flegme, to water and to the West Wind.

The diseases of this quarter be Pushes in the face, Leaprosie, Toth-ach, red spots and Feuers, the Scab, fluxes of blood by the inferior parts, paine in the eyes, Palseys, Gouts, and such like, according to the nature of the quarter.

Of the Spring.

THe Spring taketh its beginning vpon the 10. day of March, 58. min. after high noone, the nature of it is hot and moyst: and therefore resembled well to youth, blood, the ayre, and to the South wind.

The ordinary diseases of this quarter are Leaprosies, red spots, tooth ach, feuers of blood, pushes or wheales in the face, small poxe, ringwormes, falling sicknesse and payne in the throat and necke, Kings Euill, Wens, griefe in the shoulders and armes caused by blood, and whatsoeuer diseases els protected from a hot and moyst cause.

Of Summer.

SUmmer taketh its beginning this yeare vpon the 11. day of Iune, at 4 of the clocke and 45. min. after noone. The nature of this quarter is hot and dry, and it is resembled to Infants, Choler, the Fire, and to the East Wind.

The diseases incident to this quarter bee griefes and torments about the brest, ribs and spleene, pushes, leprosie and diseases of the face, as in the Spring: bleare and sore eyes, with other impediments therein: The Pluriſie, cough, hart

and

& stomacke aking, sorrow, vexations, feuers of blood, apostumes: pestilence, the Iaundice, paynes in the belly and secret parts, with other infirmities of a hot and dry nature.

Of Autumne.

AVtumne or Harueſt begins this yeare vpon the 13. day September at 7. of the clocke and 22. min. in the morning. The nature of it is cold and dry, and therfore not vnlikely to sembled to old Age, Melancholy, the earth, and the North winde.

The diſeaſes of this quarter properly bee paynes in the backe, darkeneſſe of ſight, retention or vrine, fluxes of blood paynes in the backe and priuie parts, with infirmities in the face as in the Spring: alſo the Canker, Fiſtulaes, Emrods, the ſtone and grauell, feuers of blood, and impediments in the eyes.

Poma dat Autumnus, formoſa eſt meſſibus æſtas,
Ver præbet flores, igne leuatur Hyems. *Ouid.*

Eclipſes. 1626.

THere will be obſerued this yeare Three Eclipſes; Two of the Sunne, and one of the Moone: whereof that of the Moone will onely be ſeene vpon our Horiſon.

The firſt Eclips will be of the Sun vpon the 16. day of February, at 7. clocke and an halfe in the morning.

The Second will be of the Moone vpon the 28. day of at 7. a clocke at night, a very ſmall one, to the quantity one poynt or digit, and this onely we ſhall ſee.

The Third will be of the Sun, vpon the 11. day of Aug at 10. a clocke at night.

Of the mooueable Feasts.

MOueable Feasts are those which haue no fixed places in the Kalender, and are 6. in number, to wit, Septuagesima, Quadragesima, Easter, Rogation Sunday, Assension, and Whitsunday.

Septuagesima, is so called of 70. as it were containing 70. dayes, which the Church doth obserue in remembrance of the 70 yeares, that the Children of Israell were vnder the Babylonian seruitude, and is alwaies three Sundayes before Quadragesima.

Quadragesima, is simply sayd of 40. as containing 40. dayes, which the Church recounts in remembrance of the 40. dayes that Moses fasted, when he received the Lawes of our Lord. Elias fasted so many dayes, and so many dayes fasted Christ before the tempter came.

Easter is the principall of all other feasts, and so ordayned of God at first, and at this day there be three sorts, that is Pascha Hebræorum, the Iewes Easter, Pascha verum our Easter, & Pascha novum, the Roman Easter.

The Iewes Easter was commanded to be kept the 14. day of the first moneth called Abib, which day at euen was the Lords Passouer: and the Nineteenth day should bee the holy Conuocation.

Our Easter was ordayned Three Hundred Twenty Three yeares after the incarnation, in a Councell of learned men of diuers nations, assembled by Constantine the great, for that purpose, wherein it was ordayned that Easter should bee celebrated on the Sunday next following the first full Moone that should happen after the entrance of the Sun into Aries, and a new Golden number was there deuised for the same intent. But by reason that the Aequinoctium still flyes backward from the 21. of March where vnto it was (in so much that it is now about the 11) day there sometimes happens 2. full Moones before wee can keep our Easter, which caused the Romans to alter their Kalender, so that by their Paschall tables they produce Easter alwaies the Sunday following the first full Moone according to the foresaid generall counsell held at Nice in Pontus.

Rogation is so called because, nos rogat Ecclesia, the Church commands vs to continue fasting, processions, and prayers as well against the bodily wolues such as late were in France, as also against the spirituall wolues.

Pentecost is so called from Pentecostos which is 50. because there be 50. dayes betwixt Easter and Whitsunday inclusiuely. And this time the Church doth obserue in memoriall of the holy Ghost that appeared to the Apostles like clouen tongues. Act. 2.

Of

Of the Heauens, Starres, and Planets.

HEauen, in the mother of Tongues is called Schamaiim: which word (as some affirme) is compounded of Scham signifying There or In that place, and Maiim, waters. Whereupon they conclude, that heauen is nothing else but Aquæ consolidatæ, waters firmely compacted together, as it were Christall.

The Talmudists alledge that it is either compounded of the verbe Schaah signifying (in Hithpael) to wonder & of Maiim, because men are drawne into exceeding admiration, in considering the workemanship of the Heauens: Or of Esch and Maiim fire and water. And thereupon Rabbi Bechai in the beginning of Paraſch writeth after this manner: The Hrauens (sayth hee) were created in the beginning, and are called shamaiim because they are Esch and maiim fire and water. And in Bereschith Rabba, it is thus read, The Heauens are so called, because men wonder at them saying: Of what are they made? They art made of fire, they are made of water: this is a thing to be admired.

Yet true it is, that many excellent Gramarians suppose that the Hebrew word is neither deriuatiue, nor compound but priuatiue, of which opinion is that famous Hebritian, Valentine Schindler. And Fagius a great author in that tongue (vpon the first chapter of Genesis) writeth that Abenesra proueth out of the Ismaelitish tongue (which hath very great affinity with the Hebrew) that Schama signifieth nothing else, but High or Aboue.

But howsoeuer it be, or whatsoeuer is the true Etymologie of the word, this we are sure of, that Heauen in the Scripture is Threefold. 2. Corinth. 12. 2.

1 Ayerie, where the Foules are. Gen. 2. 18.
2 Starry, where the Stars are. Gen. 1. 17.
3 Glorious, where soules are, and it is called the Heauen of Heauens, 1. King. 1. 27. and of Philosophers Empyreum.

The middlemost of which Three called the firmament, is that which containeth all those beautifull & bright shining lights, created by the Almighty Elohim, God in three persons vpon the fourth day of the Creation. Gen. 1. 14. &c.

Of

Which lights (whether moued in their seuerall spheares accoꝛding to the generall opinion receiued frō reuerend Antiquity: oꝛ else moued as Fishes in the sea, oꝛ Foules in the Ayꝛe, accoꝛding to Tycho Brahe, and others the best moderne obseruatoꝛs) by the common consent of all Astronomers, are of two soꝛts, that is to say, Fixed, and Wandring, called Planets of Planaomai, signifiyng to wander. Fixed Starres are deuided into 48 Constellations, which are distinguished into 6 degrees of magnitude; Of the first magnitude are 15, Of the second 45, Of the third 208, Of the Fourth 474, Of the Fift 217, Of the sixt 49, to which are added 5 of an vncertaine magnitude, called cloudy, and 9 other yet moꝛe obscure, The Planets are in number 7 which are these, ♄ the highest, and next beneath the fixed starꝛs; ♃ next, then ♂, ☉, ♀, ☿, and ☽ in oꝛder. Now foꝛ the diameters, magnitudes, and distances of them, aswell fixed, as wandring: behold this Table.

Starres of the 1 2 3 4 5 6 magnitude.	haue their true Diameters in proportion to the earths Diameter, as	Containyng the earths bodie.	Their bodies contayning the earths bodie.	Times.	Their distances in Semidiameters of the Earth.	Their meane motions.
